

International Conference

“DNA polymorphisms in Human Populations *Molecular Anthropology in the Genomic Era*”

In the course of *Molecular Anthropology in the Genomic Era*, fourth conference of the series **DNA polymorphisms in Human Populations**, leading scholars will present and discuss the state-of-the-art of research in human evolutionary genetics, with attention paid to the growing impact of next-generation DNA sequencing methods and bioinformatic approaches.

Putting Molecular Anthropologists face-to-face with researchers from Archeology, Linguistics, Paleoanthropology and Medicine, the meeting will also provide an opportunity to debate the present and the future of interdisciplinary interactions.

Leading organizers

Franz Manni (*Musée de l'Homme*, Paris)

Giovanni Destro Bisol (*Università "La Sapienza"* & *Istituto Italiano di Antropologia*, Roma)

Scientific committee

Chiara Batini (Italy), Cristian Capelli (UK), Oscar Lao Grueso (Netherlands), Andres Moreno-Estrada (USA) & Paul Verdu (USA)

Invited speakers

Quentin Atkinson (UK), Guido Barbujani (Italy), Mark Collard (Canada), David Comas (Spain), Claudio Franceschi (Italy), Mark Jobling (UK), Connie Mulligan (USA), John Novembre (USA), Martin Richards (UK), Jorge Rocha (Portugal)

Rome, 3-5 december 2009, University of Rome “La Sapienza”
